ACADEMIC PROFILE

Cloud-focused engineer with 5+ years of experience in telecommunications and network infrastructure at Huawei. Specialized in **Cloud Architecture, DevOps, and Data-Driven Automation**, with a track record of building end-to-end monitoring platforms, automating operational workflows, and architecting cloud migrations. **First Iranian to achieve Huawei HCIP Cloud Service Solutions Architect certification.** Complemented by verified coursework in mathematics and data science from Imperial College, Harvard, and Johns Hopkins. Seeking international opportunities in **Cloud Engineering, DevOps, or research-oriented roles** in Computer Science.

EDUCATION

Bachelor of Science in Electrical Engineering

2018 – 2023

Islamic Azad University South Tehran Branch, Tehran

- *Relevant Coursework:* Data Structures, Probability & Statistics, Signals & Systems, Circuit Analysis.
- *Final Year Project:* IoT-based monitoring system (Concept & Architecture).

PROFESSIONAL EXPERIENCE

Data Analyst – Automation Lead

Jan 2026 – Present

Vista Service, Tehran

- Sole architect and developer of an end-to-end core network monitoring platform: designed the full **ETL pipeline**, containerized the stack with **Docker**, and built **Python** backends integrated with **PostgreSQL**.
- Replaced legacy monitoring tools with a modern, high-availability solution, significantly reducing monitoring delay and boosting troubleshooting efficiency across core network nodes.
- Dockerized and migrated legacy NPM platforms to modern infrastructure, ensuring data integrity and accessibility for analysis.

Data Analyst

Jan 2025 – Dec 2025

Huawei Technologies Service (Iranian), Tehran

- Automated **9 recurring reports** (4 daily, 3 weekly, 2 monthly) for KPI dashboards and subcontractor performance evaluation using **Python, Pandas, and Bash scripting**.
- Designed process workflow, led cloud migration, and presented a parking management platform for the office.
- Built a **web crawler** to ingest power outage data from the national power company, enabling proactive prediction of outages affecting critical network nodes and hub sites.

NOC Lead Data Analyst

Jan 2023 – Oct 2023

Huawei Technologies Service (Iranian), Tehran

- Led the technical implementation of the “New ERA” NOC Automation project: automated the radio network ticketing system, **eliminating the need for approximately 6 engineers per 12-hour shift**.
- Developed Python-based detection logic and health-check routines integrated with **Huawei U2000**, processing **500–1,000 tickets via automation** per cycle alongside 100 manual reviews.
- Provided ongoing system efficiency analysis and condition tuning for automated processes.

Mandatory Military Service

Oct 2023 – Jan 2025

FO Technical Support Engineer

Jan 2022 – Jan 2023

Huawei Technologies Service (Iranian), Tehran

- Handled 500–1,000 automated and 100+ manual tickets across BSS environments spanning **GSM, UMTS, LTE, and 5G** networks.
- Developed a power anomaly detection mechanism to identify and flag irregular behavior in network infrastructure.

RAN Field Operations Engineer

Aug 2020 – Dec 2021

Huawei Technologies Service (Iranian), Tehran

- Performed remote monitoring and ticketing operations for Huawei RAN infrastructure, building a strong foundation in telecommunications protocols and network management.

CERTIFICATIONS & SPECIALIZED TRAINING

• **Cloud Architecture (Expert Level):**

- [HCIP – Cloud Service Solutions Architect](#) (Huawei Official Exam, 2025) *ID: 010202602401810059091409*
- [HCIA – Huawei Cloud Services](#) (Huawei Official Exam, 2025) *ID: 010102601401810047131409*

• **Data Science & Mathematics:**

- [Mathematics for Machine Learning: Multivariate Calculus](#) (Coursera – Imperial College London, 2023)
- [Mathematics for Machine Learning: Linear Algebra](#) (Coursera – Imperial College London, 2023)
- [Data Analysis Using Python](#) (Coursera – University of Pennsylvania, 2022)
- [Fat Chance: Probability from the Ground Up](#) (EdX – HarvardX, 2022)
- [Data Science Math Skills](#) (Coursera – Duke University, 2022)

• **Programming & Algorithms:**

- [Introduction to Python Programming](#) (Coursera – University of Pennsylvania, 2023)
- [The Data Scientist's Toolbox](#) (Coursera – Johns Hopkins University, 2023)
- [Getting and Cleaning Data](#) (Coursera – Johns Hopkins University, 2023)

TECHNICAL SKILLS

- **Languages:** Python (Advanced), Bash Scripting, SQL (Intermediate), C (Basic).
- **Cloud & DevOps:** Huawei Cloud, Docker, Kubernetes (Exposure), Linux Administration.
- **Data & Automation:** ETL Pipeline Design, Pandas, Web Scraping, Excel (Advanced), Data Visualization.
- **Telecom:** Huawei U2000, RAN/BSS Operations, GSM/UMTS/LTE/5G, Network Performance Monitoring.
- **Research:** Academic Writing, Problem Solving, Self-Directed Learning.

LANGUAGE PROFICIENCY

- **English:** TOEFL iBT 118/120 (June 2026)
- **Persian:** Native
